Wantagh, NY 11793

Reference: US NAVY CLEAN Contract No. N62472-03-D-0057
Contract Task Order 066 (OU-2 Off-Site Groundwater Investigation)
US NAVY CLEAN Contract No. N62470-08-D-1001
Contract Task Order WE44 (Site 1 – Groundwater Investigation)

Subject: Naval Weapons Industrial Reserve Plant (NWIRP) Bethpage, NY
Request to discharge groundwater generated from OU-2 and Site 1 groundwater investigations

Dear Mr. Witkowski:

Tetra Tech NUS, Inc. (TtNUS) is conducting groundwater investigations at NWIRP Bethpage Site 1 and several off-site locations south of the facility. These investigations are being conducted for the United States Navy, Naval Facilities Engineering Command Mid-Atlantic Region. Waste water generated during these investigations is from groundwater monitoring well development, equipment decontamination, and sampling activities. Prior to discharge, the waste water is accumulated at NWIRP Bethpage in 21,000 gallon capacity Frac tanks and tested. Settled solids are separated from the waste water prior to discharge, dewatered, and sent off-site for separate disposal.

TtNUS anticipates the subject investigations to continue through December 2011 and approximately 300,000 gallons of waste water will be generated. TtNUS is seeking approval to discharge groundwater generated from these investigations to the County's sanitary sewer system (Cedar Creek Water Pollution Control Plant) via the sanitary sewer access location on-site at 999 South Oyster Bay Road (NWIRP Bethpage).

If you have any questions or require additional information with this request, please do not hesitate to contact me at david.brayack@tetrattech.com or (757) 461-3824. If I am unavailable, please contact Rob Sok at rob.sok@tetrattech.com or (757) 466-4904.

Sincerely

David D. Brayack, P.E.
